

## Versant Health Enabled Real-Time Data Sharing with Advanced Analytics Platform Powered by Snowflake, Okta, IDMC, and PowerBI

### Challenge

Due to its traditional on-prem ETL Databases and Batch based ecosystem, Versant Health was experiencing various data concerns like:

Legacy siloed data	Regulatory compliance risks
Poor data quality	Inconsistent data across departments

The dependence on manual data processes also led to increased business risks and capital expenditures.

### Solution

LumenData collaborated to standardize and automate their data systems. We empowered them with an Advanced Data Analytics platform, powered by Snowflake, Okta, IDMC, and PowerBI. This helped them:

- ✓ Migrate to a cloud data warehouse
- ✓ Share real-time data with B2B partners
- ✓ Generate and update insights as data drifts on an ongoing basis
- ✓ Achieve end-to-end HIPAA compliance

### Outcome

Integration of in-house Database Management System
Seamless data sharing via SSO-enabled PowerBI
Migration of 5 data domains to Snowflake Cloud Data Warehouse
Identity Management and Access Control by Okta
Implementation of a usage-based cost model with future cost guidance

### Our Services

- Cloud Modernization
- Data Strategy & Business Value Assessment
- Data Analytics & Engineering

### Our Recognitions
