

Food & Drug Administration (FDA)

LumenData helps FDA create a single source of truth for 2K+ regulatory viewers

Challenge

Due to over 150,000 regulatory submissions, 88,000 firm registrations and listings, and 1.8 million adverse event reports, FDA faced the following concerns:

Complex regulatory landscape

Inconsistent information management

Increasing complexity of the international supply chain

Objective

Modernized data management

Granular understanding of the global drug supply chain

Solution

✓ Design and analysis of different data domains including medicinal product, study, application, pharmaceutical product, and more

✓ Rapid development processes to analyze data models

Outcome

Detailed and accurate view of real-life supply chain

Updated supply model to improve data consistency

Single source of truth for 2K+ regulatory viewers

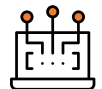

Implementation of data cleansing and data enrichment capabilities

Improved approach for managing identifiers for downstream systems
