

LUMEN DATA SERVICES FOR THE PUBLIC SECTOR

Agencies across Federal, state, and local governments are under pressure to modernize, leverage information to streamline operations, make data-driven decisions, and ease interactions with all stakeholders. But that is increasingly difficult as data volumes continue to explode and many agencies are tethered to old, inflexible, disparate legacy data management infrastructures.

With our laser focus on data, LumenData provides expert data management guidance to Public Sector entities and agencies at all levels. Our services help our clients better manage the data they have, more easily use that data to benefit their stakeholders, and quickly comply with emerging mission demands, such as new laws and regulations. We assist in successful modernization and digital transformation efforts and help bridge the gap between legacy systems and new tools/technology.

“LumenData has been a trusted partner for several years, providing MDM expertise and enterprise data strategy thought leadership.”

-- Data Management Capability Leader, Federal Agency

LumenData at a Glance

LumenData, a minority-owned small business, is a leading Enterprise Information Management (EIM), Enterprise Data Management (EDM) consulting and product development firm. We have offices in the Washington DC metro area, Santa Clara, Singapore, and Bangalore, and employees across the U.S.

Our deep-rooted product knowledge comes from decades of experience in leading and developing products at major software companies. Our methodologies are designed to identify key value drivers and deliver the most impactful business results while minimizing risk.

Through a combination of highly trained consultants, strong partnerships, a relentless focus on quality, and active executive oversight, LumenData has successfully delivered planning, implementation, integration, maintenance, and training services to over 100 customers across Public Sector, Healthcare and Life Sciences, Financial Services (Commercial, Insurance, Wealth Management), Manufacturing, Higher Education, Retail, Telecom, and other industries.

Our staff average 10+ years of business/technology experience with skills in numerous data domains, including cloud solutions, big data, security/compliance, data warehouse, visualization/dashboards, enterprise data strategy, data governance, BI, and reporting.

LumenData: The Ideal EDM Implementation Partner

LumenData Delivers Value Throughout the Data Management Lifecycle

Key Facts about LumenData

- We are not generalists, but instead have a laser focus on EDM throughout the full data lifecycle, delivering capabilities such as Master Data Management, Data Quality, Data Governance, Data Lakes, Analytics, and Business Intelligence. We have delivered over 100 EDM solutions and continue to rapidly grow in clients, technology partners, and capabilities.
- We have established an EDM framework of tools, templates, best practices, integration accelerators, and industry focused solutions.
- Our data management professionals have deep expertise and have successfully delivered across numerous data domains (e.g., Customer, Product, Supplier, Location, Financial) and all EDM competencies, including Big Data, Data Warehouse, Visualization/Dashboards, BI, and Reporting.
- Our emphasis is on the organization and its end users, with technology as an enabler of strategic objectives, supported by greater efficiency and more reliable data.
- Our data governance approach is pragmatic and focused on ensuring processes related to technical implementation are in alignment with strategic governance objectives.
